PROJECT EXPERIENCES

1. Web Development – Pondok Makan Kang Naryo

Tech Stack: Laravel, MySQL, QA

Description:

- Developed a website to showcase menu, gallery, and accept orders.
- Contributed as backend developer and handled deployment.
- Conducted functional testing on login, checkout, and admin product features.
- Created test scenarios and documented bugs for improvement.

Repository: <https://github.com/phannstastic/Pondok-Makan-Kang-Naryo.git>

Repository QA: <https://github.com/phannstastic/pondok-makan-kang-naryo-ui-testing.git>

2. Web Development – Loafy Bakery

Tech Stack: PHP Native, MySQL, HTML/CSS

Description:

- Built a bakery web application with admin dashboard, product management, and order tracking.
- Focused on backend development and database structure.

Repository: <https://github.com/phannstastic/Loafy-Bakery.git>

3. Automation Testing – XYZ Bank Web App

Tools : Cypress

Description :

- Automated feature testing on a simulated bank website using Cypress.
- Created test scenarios for login, add customer, account opening, and transaction features.
- Conducted UI testing and user workflow validation.

Repository: <https://github.com/phannstastic/xyz-Bank-Cypress-Test.git>

4. API Testing – Swagger Petstore V2

Tools : Postman

Description :

- Performing API testing on Petstore swagger v2.
- Create requests and validate response statuses, JSON structures, and error scenarios.
- Build collection automation with Postman.

Repository 1: <https://github.com/phannstastic/Petstore-Swagger-V2.git>

Repository 2: <https://github.com/phannstastic/Petstore-Swagger-V2-Part-2.git>

5. UI Testing – OrangeHRM Login

Tools : Katalon Studio

Description :

- Perform automation testing on the orangeHRM login form.
- Use Katalon Recorder to compile and execute test steps.

Repository: <https://github.com/phannstastic/OrangeHRM-Login.git>

CERTIFICATIONS

1. **Bootcamp Quality Assurance Sanbercode (2025)**
